Happy Fall!

Fall has finally arrived. That means it's time for Halloween, pumpkins, cooler weather and changing leaves. Now is the time to get in to see our physicians before the end of the year and deductibles re-start. Don't delay! If you have previous injuries, joint pain, tendonitis, or ligament pain then you should learn about all our **stem cell injections** by [clicking here](#).

5 Suggestions For Bringing Down Inflammation Naturally

Inflammation is the body's natural reaction to an infection or injury. The body becomes hot, red, swollen and sometimes this leads to pain. Inflammation can initiate the healing process, but when inflammation becomes chronic it becomes a problem... Here are our suggestions of food and supplements that can help you reduce inflammation...

How Stem Cell Therapy Works For Knee Injuries And Arthritis

Knee pain is a common occurrence and most people will experience some sort of knee pain at one point in their lives. Chronic knee pain can make it difficult to stay active and end up affecting your daily life. Injuries from sports can be the cause of knee pain, especially for muscle strains, tendinitis or damage to ligaments or cartilage. For some, Osteoarthritis is the reason for knee pain and if not treated can continue to degenerate and sometimes require surgery. Stem cell therapy is a great alternative to surgery and can provide pain relief and help to reduce swelling and inflammation...

Pain Relief From Old And New Sports Injuries

If you are an athlete or a "weekend warrior" who has been injured, or maybe you have an old sports injury that causes you pain, you are probably looking for a solution to help your body heal and live pain free. Your first step should be visiting an Orthopaedic physician who can help you evaluate and treat a sports injury. Here we have listed some of our best options for treatments to discuss with your doctor...

Workplace Injuries: Back Strains And Pains

No matter if you work in a warehouse or an office, you are susceptible to workplace injuries. One of the most common types of workplace injuries are back injuries. Back pain can range from mild pain to severe pain and can last only a short time or be a life-long problem. If your back is injured at work, then you are entitled to file a workers' compensation claim. Here we review some of the most common back injuries...
