**NON-SURGICAL  
ORTHOPAEDICS, P.C.**  
*Specializing in Spine Care & Pain Management*

## Practice News from Non-Surgical Orthopaedics, P.C.

Non-Surgical Orthopaedics, P.C. is one of Atlanta's premier non-surgical orthopaedic practices and an industry leader for the non-invasive treatment of back pain, neck pain and other orthopaedic injuries.

### NECK PAIN FROM MOTOR VEHICLE ACCIDENTS

Whiplash, otherwise called cervical acceleration or deceleration injury, results from sudden, jolting motions that force the neck beyond its normal range of motion. The head is suddenly and violently whipped back and forth, while the cervical spine can be hyper extended or forced past its normal range of motion as well. All of these motions combined can injure the vertebrae, supporting

ligaments, joints and muscles in the neck region.

### COMMON TYPES OF MEDICATIONS FOR ORTHOPAEDIC INJURIES

There can be a pretty substantial difference in your comfort level between dueling out an injury with the right medication or letting time take its course and thereby allowing your injury to heal. In severe pain situations, medication may be one of the only ways that will help to keep you pain free, even if it is only for a few hours. With spine and orthopaedic injuries, medications are beneficial in relieving aches for both

acute and chronic pains. Below is a list of commonly used types of medications that I recommend for spinal pain and orthopaedic injuries: [Read More](#)

### 18 Years Of Excellence

At Non-Surgical Orthopaedics P.C., we treat problems related to the back and neck such as herniated discs and sciatica. We also

## Georgia Institute for Clinical Research, L.L.C

Our [Clinical Research Department](#) is participating in clinical trials for the following conditions:

- Osteoarthritis (hips and knees)
- Low back pain
- Shoulder pain
- Acute and chronic pain of any type
- Opioid induced constipation (OIC)
- Diabetic neuropathy
- Muscle spasms

We currently have a variety of study opportunities for patients and others interested in participating in clinical trials. Typical requirements for participation in these studies include the criteria outlined below:

- Males / Females, ages 18-75
- No diagnosis of cancer within the past 5 years
- No diagnosis of rheumatoid arthritis or gout
- No history of seizure disorder or epilepsy
- No history of gastric bypass surgery
- No corticosteroid injections within past 3 months
- No hyalgan injections within past 6 months
- Willingness to convert current pain relief regimen to an Investigational Product

Please contact us if you are interested in learning more about these clinical research opportunities at 770-421-2030.
